

ODP 1678-77

24 AUG 1977

MEMORANDUM FOR: Director of Communications

FROM : Clifford D. May, Jr.  
Director of Data Processing

SUBJECT : CDS-ODP Interface: Procedures to Add New Users

REFERENCE : Memo fm D/OC to C/SS/DDO, D/CRS, D/OJCS dtd 12 June 75, subject: CDS-OJCS Interface Specification (OC-10-75-373)

1. The CDS-ODP Interface is scheduled to become operational on or about September 1977. When it is operational, the initial set of users, OCR, OC, OWI, OSO, and DDO, will begin receiving digitized cable traffic from CDS via the Interface. After that date, other Agency components may decide to use the Interface to receive digitized cable traffic from OC. We believe the process of adding new users to this Interface should be formalized, and have prepared the attached procedures for your concurrence.

2. [REDACTED] the CDS-ODP Interface Project Manager, has discussed the procedures with [REDACTED] the OC CDS Project Manager, and [REDACTED] OC. They agree with the procedures, but believe you and I should concur in them before they are implemented. If you or your staff need additional information, please contact [REDACTED] on ext. [REDACTED]

3. If you agree with this procedure, please sign and return the original of this memorandum for our records. Perhaps the procedure can best be promulgated to Agency components through publication in channels available to OC.

[REDACTED]  
Clifford D. May, Jr.

## ATTACHMENT A

PROCEDURE FOR ADDING NEW  
USERS OF CDS-ODP INTERFACE

1. The Cable Dissemination System (CDS) has established a communication link with ODP computers. The link acts as a remote job entry (RJE) station which submits job runs containing cables and JCL to ODP computers. ODP has prepared software to distribute the cables forwarded by CDS. This software is known as the CDS-ODP Interface.

2. When the Cable Dissemination System (CDS) becomes operational there will be a capability to provide digitized cable distribution from OC to any Agency component requiring this service. The procedure for providing cable distribution facilities to additional ODP customers is:

- (1) Potential customers will first coordinate with the Cable Secretariat to determine whether the CDS can process the digital traffic requested by the customer.
- (2) In the event the CDS can process the traffic, the Cable Secretariat will request that the customer prepare a computer applications request/action Form 930. (See Attachment B). This form will be forwarded to the Office of Data Processing through the Cable Secretariat. The Cable Secretariat will append the User Program Identification (UPID) code and the date when the new customers data will begin to arrive for processing in ODP.
- (3) After the Form 930 is received in ODP, the CDS-ODP project leader will coordinate with the customer in the development of computer processing requirements to ensure that the traffic is handled by ODP in a satisfactory manner.

PROCEDURE FOR ADDING NEW  
USERS OF CDS-ODP INTERFACE

1. The Cable Dissemination System (CDS) has established a communication link with ODP computers. The link acts as a remote job entry (RJE) station which submits job runs containing cables and JCL to ODP computers. ODP has prepared software to distribute the cables forwarded by CDS. This software is known as the CDS-ODP Interface.

2. When the Cable Dissemination System (CDS) becomes operational there will be a capability to provide digitized cable distribution from OC to any Agency component requiring this service. The procedure for providing cable distribution facilities to additional ODP customers is:

- (1) Potential customers will first coordinate with the OC/CDS Project Manager to determine whether CDS can process the digital traffic requested by the customer.
- (2) In the event CDS can process the traffic, the CDS Project Manager will forward a speed letter to ODP informing the ODP CDS-ODP Project Manager of the new customer, the User Program Identification (UPID) code assigned to the customer, and a date when the new customer's data will begin to arrive for processing in ODP. (See Attachment B).
- (3) The OC CDS Project Manager will request the customer to formally coordinate with ODP. The customer will prepare a Computer Applications Request/Action Form 930. (See Attachment C). The CDS-ODP Project Leader will coordinate with the customer to develop computer processing requirements so that the traffic is handled by ODP in a satisfactory manner.

This office has coordinated with the OC CDS Project Manager to have cable traffic forwarded to ODP.

We request that the CDS-ODP Interface be expanded to handle our cable traffic.

Our representative will coordinate our requirements.

MEMORANDUM FOR: Chief, Services Staff, DDO  
Director, Central Reference Service, DDI  
Director of Joint Computer Support, DDA

SUBJECT : CDS-OJCS Interface Specification

REFERENCE : OC-M-74-299, dtd 4 June 1974, Subject:  
CDS Interface Coordination Group

1. The CDS Interface Coordination Group, established by the referent memorandum, has prepared the attached CDS-OJCS Interface Specification for your approval. This specification describes the manner in which the Office of Communications' Cable Dissemination System will link the Agency's telecommunications network with information processing systems such as Project SAFE.

2. The present schedule anticipates activation of the Cable Dissemination System in June 1976, at which time the CDS-OJCS link will become operational. In the meantime, OJCS should develop a monitor program for its system to permit testing and support of the interface beginning in early 1976.

3. Your response to this memorandum is requested by 27 June 1975. Should additional information be required, members of your staff may contact [redacted] on [redacted] extension [redacted].

Discussion:

1. The Cable Dissemination System (CDS) has established a communication link with ODP computers. The link acts as a remote job entry (RJE) station which submits job runs containing cables and JCL to ODP computers. ODP has prepared software to distribute the cables forwarded by CDS. This software is known as the CDS-ODP Interface.

2. When the Cable Dissemination System (CDS) becomes operational there will be a capability to provide digitized cable distribution from OC to any Agency component requiring this service. The memorandum attached will formalize the procedure for providing cable distribution facilities to additional ODP customers.
